

Patient Safety

Industry-leading fall prevention and patient monitoring solutions.

Overview

USPC provides industry-leading fall prevention and patient monitoring solutions designed to improve patient safety and reduce risk. Our wireless and wired monitoring systems deliver immediate audible alerts when a connected sensor is activated, helping caregivers respond quickly and confidently to reduce fall-related injuries.

What's Included

- Bed exit and chair exit monitoring systems
- Wireless universal monitors compatible with bed, chair, floor, and commode pads
- Floor sensor mats and fall prevention accessories
- Bariatric safety solutions
- Wheelchair seatbelts and nurse call cord accessories

How We Support Your Facility

We work directly with hospitals, rehabilitation centers, skilled nursing facilities, assisted living communities, and long-term care facilities to design a patient safety solution tailored to their specific fall-risk challenges.
