

Staff Education & Training

Comprehensive training that builds caregiver confidence.

Overview

USPC delivers comprehensive training programs that help caregivers confidently utilize patient safety equipment and adopt best practices. Well-trained staff are essential to a successful, sustainable patient safety program.

What's Included

- Hands-on staff training for all monitoring equipment
- Best-practice education on fall prevention protocols
- Training materials tailored to hospitals and care facilities
- Refresher sessions and onboarding for new staff
- Guidance on compliance and accountability standards

How We Support Your Facility

Our education programs are designed to improve compliance, boost staff confidence, and strengthen accountability so your patient safety program delivers results long after installation.
